

Service Offered by iOnTech Consulting Group

BUSINESS ANALYTICS

In the fast paced-global economy, organizations do not have luxury or patience for lengthy and costly software implementations.

iOnTech Consulting Group can help your organization get off to a rapid start in Business Intelligence. Our skilled consultants armed with our proven implementation methodology can implement a pre-build BI application within 60 business days. A rapid start to BI will quickly deliver value to your organization as well as setting a solid foundation for future implementations.

“Never lie to get your way, try to be as humble as possible.”

iOnTech C, LLC - The Philosophy, we follow

BI PLANNING AND ASSESSMENT

Assessment services uncover opportunities to increase user adoption and business values. Technical assessment identifies performance improvement opportunities. BI Roadmap sets the right direction with the inventory of operational information.

DASHBOARDS AND REPORTING

BI presents an opportunity to bring information to life. Let iOnTech Consulting Group help your organization go beyond the constraints of traditional reporting to ensure that from front-line managers to executives, users are provided with information and insight.

DATA WAREHOUSING AND ETL

Our BI experts can quickly and cost effectively implement and manage your BI toolset, allowing precious time and resources to be dedicated to creating and adding value to applications. We have expertise in using development methods, allowing us to quickly design, develop and implement.

BIGDATA ANALYTICS

BigData Analytics is the process of examining large amounts of data of various types to uncover hidden patterns, unknown correlations and other useful information. BigData analytics is to help companies make better business decisions by analyzing huge volumes of data.
